CORE EXPERTISE

AI Product Strategy · Cross-Platform Systems · Complex Workflow Design · Workflow Automation · Enterprise UX · Information Architecture · Service Design · Design Leadership

TOOLS

Figma · v0 · Claude Code for AI prototyping

EDUCATION

Master of Human-Computer Interaction and Design

University of Washington, Seattle

Master of Architecture

University of Illinois, Urbana-Champaign

Bachelor of Architecture

Chongqing University, China

EXPERIENCE

Staff Product Designer | Included Health

11/2021 – 06/2026 | San Francisco

Cross-Platform Product Systems & Operations

- Led a redesign across three interconnected platforms, unifying consumer-facing, clinician-facing, and operations experiences to improve service delivery. Increased user satisfaction by 23% and helped double the service line’s profit margin.
- Redesigned an end-to-end claims case management system across intake, triage, handoffs, and resolution, combining workflow automation with a new information architecture to improve operational efficiency by 31%.

AI Product Strategy & Consumer Experience

- Defined the vision and led the end-to-end design of Concierge Dot, an agentic AI product that translates ambiguous user needs into the right care pathway. Reduced urgent-care task time by 12% and increased user satisfaction by 25%.
- Created a shared AI experience framework that unified fragmented product touchpoints and aligned product, engineering, operations teams around a cohesive user experience and shared platform roadmap. Adopted across 11 product teams.
- Redesigned the end-to-end billing and payment journey, increasing invoice collection by 30%+ and reducing collection costs by 26%.

Lead Product Designer | Doctor On Demand

02/2021 – 11/2021 | San Francisco

Workflow Platform & Service Operations

- Set the vision and led the end-to-end redesign of a workflow platform used by providers, reducing task completion time by 21% and increasing patient satisfaction by 16%.
- Redesigned complex, multi-role operational workflows, translating research into scalable service models, information architecture, and validated product patterns.

Interaction Designer | Google - Capstone Project for MHCID

02/2019 – 09/2020 | Seattle

AI-Assisted Data & Analytics Platform

- Designed an AI-assisted data platform that helped city leaders evaluate public programs and make planning decisions through connected workflows, analytics dashboards, and data visualizations.

Freelance UX/UI Designer

03/2016 – 01/2020 | San Francisco

- Designed and shipped 10+ iOS apps for startups and small businesses, owning product definition and UX/UI.

Urban Designer | Perkins&Will

05/2012 – 02/2019 | San Francisco

- Designed large-scale institutional master plans, coordinating complex stakeholder, spatial, and implementation constraints.
